

Let's go to Mount Carstensz

(4,884 meters) Oceania

More info about Australia y Oceanía Expeditions Tours: Karstensz Pyramid (4884 m) or simply Karstensz. This is the highest peak on the island of New Guinea, which, according to many, belongs to the mainland of Australia. The western part of the island is part of Indonesia and is officially called Irian Jaya. The expedition to Carstensz is one of our emblematic routes. The Indonesians came up with a new name for this peak, Puncak Jaya Puncak Jaya (Victory Peak). Traditionally, it is named after the Dutch navigator Jan Carstensz. He was the first to report the existence of snow-capped mountains in this equatorial region. His trip took place in 1623. And then no one in Europe believed his report. Due to the current warming, the glaciers in the summit area only have a maximum of 10 years left to live.

Highlights and hidden gems

CLIMB ONE OF THE SEVEN SUMMITS

Standing at 16,024'/4,884m, the Carstensz Pyramid is the tallest peak in Oceania. Rising out of the remote jungle of Papua New Guinea, it is often regarded as the most exotic of the 7 Summits. This steep limestone peak is the only Seven Summits that involves rock climbing, making it a unique experience for Seven Summiteers and adventure seekers alike.

Our journey to the summit of the tallest peak in Oceania starts in Bali. After arriving in Indonesia, we'll spend the first day organizing gear and resting from the long day of travel. From Bali, we'll take a flight to the city of Timika on the Island of Western Papua. After arriving in Timika, we'll re-pack and make sure that we are all dialed in for the coming expedition.

Weather permitting, we'll take a helicopter to the Carstensz base camp the following morning. Upon arriving in the Yellow Valley, we'll put up base camp and settle in. This will also be the first of our two day acclimatization period as we prepare for our summit bid.

Trip overview:

Timika - Yellow Valley - Carstensz Peak - Yellow Valley - Timika

Why go there?

We now offer to fly to Carstensz Pyramid BC by helicopter!

Carstensz Pyramid (sometimes called Puncak Jaya) is a mountain in the Sudirman Range, the western part of the

central highlands of Papua province, Indonesia. With an of altitude 4,884 metres above sea level, Carstensz

Pyramid is the highest mountain in Indonesia, the highest on the island of New Guinea, the highest of Oceania

(Australia).

Carstens Pyramid is probably technically the most difficult climb of all "7 Summits". However, it is perfectly doable

for real mountain climbers with at least basic rock climbing skills. The standard route is nearly straight up through

the north face and then continues along the summit ridge, which is all hard rock surface.

The sharp limestone rocks offer pleasant climbing at nearly 4900m/16k feet altitude near the equator! The most

difficult places are equipped with fixed ropes and the largest 'gap' in the summit ridge is crossed using the famous

Tyrolean Traverse.

Despite the nearby large goldmine, the area is highly inaccessible to climbers and the general public, requiring a

helicopter flight to Basecamp or alternatively (when it is safe) a 100-km hike, which usually takes about four or five

days each way.

The island also offers a rare opportunity to visit the Stone Age, as the traditional way of life for most inhabitants of

the island hasn't changed much over the past millennia.

Dressing appropriately for the mountains can make the difference between a pleasant trip and a really uncomfortable one. Clothing must provide the right degree of temperature, perspiration and be well ventilated. Preferably cotton clothing should be avoided, as in humid conditions they absorb body heat.

In general, the weather conditions in the Andes of South America can vary from day to day and even throughout the day. Therefore, clothing must be versatile.

Please do not hesitate to contact us with any questions you may have regarding the necessary equipment.

What our travelers or clients always ask questions before joining our trips, tours & expeditions, read all the information provided here.

Suggested FAQs

[What experience and how fit do I need to be to climb this mountain? Is this program suitable for children or older people?](#)

For our mountain climbing trips: If they are easily accessible mountains: For easy-climb mountains, well, you don't need much experience, but if you already want to climb mountains above 6,000 meters and the conditions become more difficult, we recommend if you already want to go through mountains above 6,000 meters, have a basic or intermediate course for a good preparation. It is very important to be physically, technically and psychologically prepared.

Regarding the preparation of children: Everything will depend on which mountain you want to climb with your children, once you are clear on which of our tours or mountains you want to go with your children, we can give you some advice or see how to prepare them before going with them.

Regarding older people: It all depends on the condition of experience and how well the person is in health, on many occasions older people are the best to walk in the mountains because they have more experience, so it is always good to ask and find out about their experience of older participant. If you have any other questions, please contact us. **For calls or inquiries to this number:** [+51 943 081 066](tel:+51943081066)

For this type of demanding or technical climbing sports, it is recommended to do some summits above 5 thousand meters beforehand and have good knowledge of high mountain technical equipment such as the use of technical ice axes, ice screws, correct use of crampons, and of course all the technical material. [What happens in the event of bad weather?](#)

About the meteorological conditions of the climate, we try to organize the trips of each tour in the best season to have the best views and enjoy the selected trip but sometimes even in good season we can have bad weather, in this case on hiking or treks trips the complications are minimal, but when this happens during high-altitude climbing expeditions, the complications can become very difficult, that is why the bosses or leaders of the local guides must always make the most correct decision for the safety of our passengers, so we always recommend listening to the best advice from the local guide assigned for each tour. If you have any other questions please contact us. **For calls or inquiries to this number: [+51 943 081 066](#)**

[Can I join a group?](#)

We as a local company and connoisseurs of tours have departures on different dates. The best thing to do is to join a travel group to take care of your budget, and of course you can join our groups, but on trips like mountaineering we recommend going in small groups. To join a group, ask us for the dates and we will send you the necessary information to be able to join any of our trips.

Why go in a private trip: For trips whether trekking or high mountains, going privately is the most recommended option, but the costs are more expensive. So, if one joins a group, the prices will be more reasonable. In the mountains, the only disadvantage is if you are in a wall with another partner and if one of the participants gets tired or gets sick. In this case, you have to abort or cancel the summit and return together. For more information, contact us. We can schedule a call via WhatsApp to clarify all your questions.

In a mountain, for example, if 3 people go and one of the participants falls ill on the route, for security reasons they have to cancel or abort the summit or return all together. The same in a technical mountain if the climbing partner gets sick they all have to return, for these reasons sometimes it is better to go private only because for a single person the costs are more expensive for the same reason that the trip would already be private .
