## Travel Program

## **Day 1: Immersing in the Salar de Uyuni and Local Traditions**

### **Dry Season (mid-April to December):**

Begin your journey with a morning pick-up from your chosen location in Uyuni. Your first stop is the fascinating train cemetery, where remnants of Bolivia's industrial past are scattered across the desert. From there, visit the village of Colchani, known for its traditional salt mining. Explore the vibrant market and learn about the techniques used to process salt before venturing further into the salt flats.

The day's highlight is the Salar de Uyuni, the world's largest salt flat, where you'll marvel at the endless white landscape and stop at the iconic multinational flag stand. After lunch in the middle of the salt flats, head to Isla Incahuasi. Trek to the top of this cactus-covered island for panoramic views of the salt flats and enjoy a unique opportunity to take creative, perspective-bending photographs against this incredible backdrop.

As evening approaches, you'll arrive at your accommodation near the edge of the salt flats. Here, you'll enjoy a warm meal and unwind after an eventful day, preparing for more discoveries ahead.

### **Rainy Season (January to mid-April):**

During the rainy season, day 1 is very similar to the dry season. Depending on the intensity of the rain, after visiting Colchani and learning about the history of the salt flats, you will either venture out onto the plains to reach the multinational flag, or drive along the circumference of the salt flats to view the spectacular mirror effect. Protective gear and rubber boots will be provided to walk on the flooded surface of the Salar, enjoying the intense reflection from the blue skies above.

If conditions align, you'll have the chance of seeing a mesmerising, multicoloured sunset over the vast flats.

*Meals included: lunch, dinner*

## **Day 2: Discovering Wildlife and Unique Formations in the Highlands**

### **Dry Season (mid-April to December):**

Set out early to leave the salt flats behind and travel south toward the remarkable Andean lagoons. Begin with stops at scenic viewpoints, including the semi-active Ollagüe Volcano, and take in the vibrant waters of Cañapa, Hedionda, Chiarkota, and Honda lagoons. These stunning locations are home to wild flamingos and other Andean wildlife, offering countless opportunities for wildlife photography.

As you continue, the journey takes you through the Siloli Desert, an arid region characterised by striking geological formations. The famous "Stone Tree" is one of many unique structures sculpted by wind and time. Along the way, you'll encounter vast stretches of surreal landscapes, making this an unforgettable day of discovery.

The evening brings you to your accommodation near Laguna Colorada. After a warm meal, relax and reflect on the incredible sights of the day as you prepare for the next leg of your adventure.

### **Rainy Season (January to mid-April):**

Today, you'll depart Uyuni and the salt flats, heading south to visit the stunning Laguna Colorada. On the journey, you'll stop off and explore the incredible lagoons of Cañapa, Hedionda, Chiarkota, and Honda to see the vast flocks of pink flamingoes that call this region home. Another break during the journey will take you to the barren landscapes of the Siloli desert, where you will traverse between huge natural geological formations and 'stone trees'.

Although you'll cover much ground today, there will be plenty of invigorating stops to view the staggering landscapes, wildlife and natural formations along the journey, until you reach your accommodation to enjoy a meal and spend the night.

*Meals included: breakfast, lunch, dinner*

### **Day 3: Unwinding Amid Geysers and High-Altitude Lagoons**

#### **Dry Season (mid-April to December):**

Your day begins with an early visit to the dramatic geothermal fields of Sol de Mañana. Here, steaming geysers and bubbling mud pools showcase the raw power of Bolivia's volcanic landscapes. Wander through this natural spectacle and take in the sights and sounds of an environment alive with geothermal activity.

Afterward, head to the Polques hot springs for a chance to relax in warm, mineral-rich waters surrounded by the serene high-altitude landscape. The experience offers a perfect balance of adventure and rejuvenation.

The journey continues to Laguna Verde, a stunning green-hued lagoon set against the towering backdrop of Licancabur Volcano. Enjoy the tranquil scenery and take in the unique colours of this pristine environment. As your adventure winds down, you'll make your way back to Uyuni, concluding the trip with scenic stops along the return route.

#### **Rainy Season (January to mid-April):**

The rainy season itineraries are only slightly different to the dry season. Today, on the final day of the adventure, you'll have an early start to journey to Sol de Mañana - where the earth's geothermal power explodes to the surface in the form of steaming geysers, situated high in an ancient crater.

Next, enjoy a dip in the natural hot springs in Polques and soak in the mineral-rich water. Finally, you'll reach the green lagoon of Laguna Verde, marvelling at the intensely coloured water in this scenic hotspot at the foot of Volcan Licancabur, Bolivia's most southwestern point.

Finally, it's back into the 4x4 to begin the journey back to Uyuni. Along the way, there will be plenty of stops to enjoy scenic vistas, fresh air and spectacular landscapes along the winding roads.

In the late afternoon, you'll arrive in Uyuni, marking the end of your adventure.

**For our mountain climbing trips:** If they are easily accessible mountains: For easy-climb mountains, well, you don't need much experience, but if you already want to climb mountains above 6,000 meters and the conditions become more difficult, we recommend if you already want to go through mountains above 6,000 meters, have a basic or intermediate course for a good preparation. It is very important to be physically, technically and psychologically prepared.

For this type of demanding or technical climbing sports, it is recommended to do some summits above 5 thousand meters beforehand and have good knowledge of high mountain technical equipment such as the use of technical ice axes, ice screws, correct use of crampons, and of course all the technical material. ### [What happens in the event of bad weather?](#)

About the meteorological conditions of the climate, we try to organize the trips of each tour in the best season to have the best views and enjoy the selected trip but sometimes even in good season we can have bad weather, in this case on hiking or treks trips the complications are minimal, but when this happens during high-altitude climbing expeditions, the complications can become very difficult, that is why the bosses or leaders of the local guides must always make the most correct decision for the safety of our passengers, so we always recommend listening to the best advice from the local guide assigned for each tour. If you have any other questions please contact us. **For calls or inquiries to this number: [+51 943 081 066](#)**

## [Can I join a group?](#)

We as a local company and connoisseurs of tours have departures on different dates. The best thing to do is to join a travel group to take care of your budget, and of course you can join our groups, but on trips like mountaineering we recommend going in small groups. To join a group, ask us for the dates and we will send you the necessary information to be able to join any of our trips.

**Why go in a private trip:** For trips whether trekking or high mountains, going privately is the most recommended option, but the costs are more expensive. So, if one joins a group, the prices will be more reasonable. In the mountains, the only disadvantage is if you are in a wall with another partner and if one of the participants gets tired or gets sick. In this case, you have to abort or cancel the summit and return together. For more information, contact us. We can schedule a call via WhatsApp to clarify all your questions.

In a mountain, for example, if 3 people go and one of the participants falls ill on the route, for security reasons they have to cancel or abort the summit or return all together. The same in a technical mountain if the climbing partner gets sick they all have to return, for these reasons sometimes it is better to go private only because for a single person the costs are more expensive for the same reason that the trip would already be private .
