Vilcabamba Trek to Machu Picchu

Vilcabamba was dominated by Manco Inca and his successors after the Spanish invasion. There were several administrative centers built in honor of the emperors of the last Incas dynasty, from Manco Inca to Tupac Amaru. They created a neo-imperial state in order to preserve religious and astronomical knowledge while respecting the knowledge and traditions of other pre-Incan cultures.

The territory of Vilcabamba is located northwest of the city of Cusco, in the province of Convención, in the eastern cordillera of the Andes. It has a chain of snow-capped peaks and mountains with high tropical forests where ecosystems constantly vary, passing through the high Andean plains drowned in an infinite forest of clouds.

More information: The Vilcabamba trek to Machu Picchu is a hidden treasure that has yet to be heavily impacted by tourism. The trail is remote, very beautiful and super quiet. Trekkers get to pass through snow-capped mountains on a number of original and well-preserved Inca trails. The trek is typically completed on a 5-day itinerary, although there are variations, particularly on the route out to the trailhead. Prior to the hike most trekkers will spend two days in Cusco acclimatising. If you have booked with a tour operator they will likely have organised your hotel and scheduled some city tours. Remember, Cusco is situated at 3,400m / 11,150ft and you might start feeling the effects of the altitude as soon as you arrive. Try to remain well hydrated and don't over-exert yourself by traipsing across the city – see information on acclimatisation below. We are big fans of the Vilcabamba trek but should point out that it is one of the more challenging trails to Machu Picchu. There are a number of tough ascents and descents that require a good level of fitness, and trekking days are long and tiresome. On this page you will find all the information you need to prepare for an amazing Vilcabamba trek experience, including a detailed overview on all route and itinerary options for the trek.

Route: Good trekking maps are actually quite hard to come by for quiet routes like the Vilcabamba trek. The one below is from the Trailblazer Guidebook, mentioned in our library, and recommend as the leading guidebook for alternative Machu Picchu treks. Ignoring the map key and the scale, this map provides the geographic position of the Vilcabamba trek and its general route. If you trace your eyes from Cusco in the Southeast up to Ollantaytambo you will see the route a car / train follows into the Sacred Valley. Just North of Ollantaytambo you can see Mount Veronica (5,860m) which sits adjacent to the Abra Malaga Pass (4,316m). From here you will drive along the Rio Vilcabamba through Chaullay and onto Huancacalle in the Northeast. This entire section between Cusco and Huancacalle takes between 8-9 hours driving. Although not perfectly correct, from here the route bassically follows the green line and then the dark blue line all the way up to the Hydroelectric Station (labelled as La Hidroelectrica on the map) – approx. 60km and 3 days trekking, with a hour long drive between Yanatile (not shown on the map) and the Hydroelectric Station.

Vilcabamba Trek Alternatives: As you can see from the map above there are two interesting variations on the Vilcabamba Trek.

Vilcabamba and Choquequirao Trek: The first is a combination of the Vilcabamba and the Choquequirao trek. This route is ideal for trekkers who have already seen Machu Picchu and are looking for a challenging adventure to Choquequirao, the site of another well-preserved Inca site. The route typically starts in Huancacalle and follows the green line south to Cachora, although it is possible to do the trek the other way round. The route takes between 7 or 8 days to complete. The trek is not widely offered.

Vilcabamba Trek, Espiritu Pampa and Machu Picchu: This is the ultimate Machu Picchu Alternative trek. It combines the Vilcabamba and Choquequirao trek (the green line above) as well as the Espiritu Pampa (another Inca archelogical site) – seen as the light blue line above Huancacalle on the map above. The route typically traverses South to North, from Cachora to Espiritu Pampa and onto Chaunquiri (approx.

11-12 days trekking). From here trekkers are transported by vehicle to Quillabamba where most overnight and then take a bus to the Hydroelectric Station via Santa Theresa, and onto Aguas Calientes. The trek culminates with a full day at Machu Picchu.

Best time for a Vilcabamba trek: The Vilcabamba trek is best done during the dry season (May-September). This is the peak time on the Classic Inca Trail, but on the Vilcabamba you will be lucky to see more a handful of trekkers (bliss!!). We do not recommend doing the Vilcabamba during the wet season (October-April) as rain and foggy weather is common, and obstructs the incredible views along the trail. At a push you could get away with a trek during the dry season shoulder months (October and April), but we generally recommend sticking to the dry season. Full historical details on weather patterns in and around Machu Picchu can be seen here. Please note, micro-climates predominate in the Andes. Plan for hot afternoons and cool to cold nights, with the possibility of encountering some rain all-year-round.

What experience and how fit do I need to be to climb this mountain? Is this program suitable for children or older people?

For our mountain climbing trips: If they are easily accessible mountains: For easy-climb mountains, well, you don't need much experience, but if you already want to climb mountains above 6,000 meters and the conditions become more difficult, we recommend if you already want to go through mountains above 6,000 meters, have a basic or intermediate course for a good preparation. It is very important to be physically, technically and psychologically prepared.

Regarding the preparation of children: Everything will depend on which mountain you want to climb with your children, once you are clear on which of our tours or mountains you want to go with your children, we can give you some advice or see how to prepare them before going with they.

Regarding older people: It all depends on the condition of experience and how well the person is in health, on many occasions older people are the best to walk in the mountains because they have more experience, so it is always good to ask and find out about their experience of older participant. What happens in the event of bad weather?

About the meteorological conditions of the climate, we try to organize the trips of each tour in the best season to have the best views and enjoy the selected trip but sometimes even is good season we can have bad weather, in this case on hiking or treks trips The complications are minimal, but when this happens during high-altitude climbing expeditions, the complications can become very difficult, that is why the bosses or leaders of the local guides must always make the most correct decision for the safety of our passengers, so we always recommend listening to the best advice from the local guide assigned for each tour. If you have any other questions please contact us. **For calls or inquiries to this number: +51 943 081 066**

Can I join a group?

We as a local company and connoisseurs of tours have departures on different dates. The best thing to do is to join a travel group to take care of your budget, and of course you can join our groups, but on trips like mountaineering we recommend going in small groups. To join a group, ask us for the dates and we will send you the necessary information to be able to join any of our trips.

Why go in a private trip: For trips whether trekking or high mountains, going privately is the most recommended option, but the costs are more expensive. So, if one joins a group, the prices will be more reasonable. In the mountains, the only disadvantage is if you are in a wall with another partner and if one of the participants gets tired or gets sick. In this case, you have to abort or cancel the summit and return together. For more information, contact us. We can schedule a call via WhatsApp to clarify all your questions.

In a mountain, for example, if 3 people go and one of the participants falls ill on the route, for security reasons they have to cancel or abort the summit or return all together. The same in a technical mountain if the climbing partner gets sick they all have to return, for these reasons sometimes it is better to go private only because for a single person the costs are more expensive for the same reason that the trip would already be private .
