

Manu Jungle Tours - Reserved Zone

Bearing in mind the uncontrollable forces of nature, the program could be subject to changes at any time without warning.

Manu is a rainforest that has remained intact because of its hidden location. This means the program involves much traveling by bus and boat. However, it also means you are in a part of the Amazon rainforest that has no comparison, with an untouched flora and fauna!

In this tour we travel through the mountains to enter cloud forest, where we do some walks to observe several species of birds, orchids and maybe monkeys.

After spending the night in our private lodge (Mirador), the following day we continue 4h by boat to Manu Rainforest lodge deep in the jungle, visiting hot springs on the way.

In the evening we do a night-walk to observe spiders (tarantulas), insects, frogs and snakes. The next day we explore the jungle, then spend the night in a tree house besides a mammals clay lick to watch out for tapirs, deer and other animals.

On day four we go by boat to the Reserve Zone (Casa Matsigenka Lodge). The following day we explore the primary rainforest (untouched), visiting the lakes Cocha Salvador and Cocha Otorongo.

We have the chance to see Jaguars, giant otters, many monkey species, birds like parrots and an unbelievable variety of plants like giant trees, palms and medical plants.

The following day we continue 7h by boat to Cocha Camungo and do camping in the Blanquillo lodge. On day seven we visit the famous macaw clay lick, then we go by boat and car to Pto. Maldonado. On the last day we return to Cusco by plane or bus.

- 08 Days/07 Nights
- April to December
