Trekking Huayhuash Climb Diablo Mudo (5350 m) & Climbing Nevado Vallunaraju (5686 m)

The Cordillera Huayhuash (Huayhuash Range): The Huayhuash Range is the second highest tropical mountain chain in the world, after the Cordillera Blanca (White Range), immediately to the north. Even though it is located 120 kilometers from the Pacific Ocean, the crest forms part of the Continental Divide of South America; the waters of the eastern slope flow to the Marañon River, a principal tributary of the Amazon.

Running from north to south, the main zone that has some twenty summits within about 25 km, with a secondary mountain change of summits of lower elevation toward the west that is about 15 km long. Six of the peaks are higher than 6,000 meters. Among the peaks, Yerupajá (6,617 m) stands out – it is the second highest mountain in Peru (after Huascarán, at 6,768 m.) Also of note is Siula Grande (6,344 m), which achieved fame through the book and subsequent film "Tocando el Vacio" (Touching the Void) by mountaineer Joe Simpson.

This area also hosts dozens of glacial lakes of incomparable beauty. The closest towns are Chiquián (3,400 m) and Cajatambo (3,375 m)

Vallunaraju Peak: The high peak of North Vallunaraju, 5,686 meters, is close enough to Huaraz to do a summit trek in two days via a moderate climb. Setting out for this peak, it's possible to see other peaks of the northern part of the Cordillera Blanca, including Oxshapalca (5,881 m) and Ranrapalca (6,262 m). Vallunaraju faces the city of Huaraz, and from the summit you can see Huaraz and the Callejón de Huaylas (central area of the valley between the Cordilleras Blanca and Negra.) Between these two summits there are 5 routes; we will follow the route of the first ascent 1949. It is also good place for ski mountaineering.

Highlights of the Cordillera Blanca. The highest tropical mountain range in the world, the Cordillera Blanca is part of the spectacular Andes that form the spine of South America. A mecca for hikers and outdoor enthusiasts, the region boasts over 50 peaks that exceed 15,000 feet, 700 glaciers and 300 lakes.

Day 3: Huaraz - Trekking to Laguna 69 (4450 m) - Huaraz

Laguna 69 has been called the most famous and well known lake in the Cordillera Blanca. Our trail winds through picturesque montane forests and a somewhat marshy area, always alongside a steep and daunting ridge. Behind us, the fortress-like peak of the ice giant Huascarán looms. Winding trails lead us past several wild foaming waterfalls to the lake. Laguna 69 is flanked by glacial moraines. Immediately above the deep blue surface of the lake, we see the steep ice walls of Chacraraju, one of the most beautiful, but also most difficult of the 6000 peaks in the Cordillera Blanca. Day 7: Carhuacocha - Trekking to Siula Pass (4950 m) / Laguna Quesillococha – Huayhuash (4450 m)

This part of the route is strenuous and has no obvious road. It passes through remote peaks and glaciers of Huayhuash, with the most magnificent panoramic view of the excursion. We pass Lake Carhuacocha and beyond that is the ice fall and retreating glacier of Sarapo Peak (6127m). We cross Siula Pass (4950 m) with overwhelming panoramic views. The descent into camp at Quesillococha Camp (4450 m), close to the small village of Carnicero, seems effortless after the climb.
Alternative: If you prefer an easier day, there is a route that is a little longer but less demanding and less steep: flat along the east edge of Lake Carhuacocha, climb through the Quebrada Acoshpado to the

summit of Carnicero Point (4580 m) and the smooth descent to the two lakes of Atocshaiko to Carnicero Camp or Camp Huayhuash at Quesillococha Lake (4450 m).

Those climbing Diablo Mudo (5223 m) begin very early and will have a long day. From the north side on the last steepest slopes, some with "penitentes", we'll use crampons, ice axe and harness. The feeling of success at reaching 5000 meters, and awesome views in the true sense of the word, Diablo Mudo is a well-deserved reward for the effort. The huge wild mountains of Huayhuash are laid out in front of you. Descent to the camp still follows the long route to Jahuacocha Lake.
Option: Trekking without climbing Diablo Mudo. Short descent from Cashgapampa, turning into Angocancha Gorge (4350 m) and ascent to Yaucha Pass (4750 m), where we again stop and enjoy the impressive view. throughout the day. Therefore, clothing must be versatile.

In the interest of the team's enjoyment and success, we work with every single guest to ensure they are properly prepared and ready for this expedition. No one wants to the weakest link on a trip like this. By setting

expectations and a solid training plan, we work to insure maximum cohesive success. Use this trip as an exercise motivator, and we will succeed together with style.

What is the best time of the year for this hike?

What happens in the event of bad weather?

About the meteorological conditions of the climate, we try to organize the trips of each tour in the best season to have the best views and enjoy the selected trip but sometimes even is good season we can have bad weather, in this case on hiking or treks trips The complications are minimal, but when this happens during high-altitude climbing expeditions, the complications can become very difficult, that is why the bosses or leaders of the local guides must always make the most correct decision for the safety of our passengers, so we always recommend listening to the best advice from the local guide assigned for each tour. If you have any other questions please contact us. **For calls or inquiries to this number: +51 943 081 066**

Can I join a group?

We as a local company and connoisseurs of tours have departures on different dates. The best thing to do is to join a travel group to take care of your budget, and of course you can join our groups, but on trips like mountaineering we recommend going in small groups. To join a group, ask us for the dates and we will send you the necessary information to be able to join any of our trips.

Why go in a private trip: For trips whether trekking or high mountains, going privately is the most recommended option, but the costs are more expensive. So, if one joins a group, the prices will be more reasonable. In the mountains, the only disadvantage is if you are in a wall with another partner and if one of the participants gets tired or gets sick. In this case, you have to abort or cancel the summit and return together. For more information, contact us. We can schedule a call via WhatsApp to clarify all your questions.

In a mountain, for example, if 3 people go and one of the participants falls ill on the route, for security reasons they have to cancel or abort the summit or return all together. The same in a technical mountain if the climbing partner gets sick they all have to return, for these reasons sometimes it is better to go private only because for a single person the costs are more expensive for the same reason that the trip would

already be private .
